🌐 <https://ralphportfolio.herokuapp.com/MyProfile>

I spent five years maintaining a Quality Assurance System of an ISO-certified client that produces electronics for Aviation. I am well acquainted with the manufacturing environment from onsite deployments. My recent work involves the development of software for the Internet of Things (IoT) which includes reading data from sensors and controlling field devices. I am eager to learn and can work with less supervision. You can expect me to have initiative.

Education:

- **Bachelor of Science in Computer Science**
April 2010 – April 2015
